

ACEopedia

**ACE IS THE TRADE PROCESSING
SYSTEM THROUGH WHICH CBP AND ITS
PARTNER GOVERNMENT AGENCIES HAVE
IMPLEMENTED THE SINGLE WINDOW FOR
PROCESSING IMPORTS AND EXPORTS.**

The Automated Commercial Environment (ACE) is the backbone of U.S. Customs and Border Protection's (CBP) trade processing and risk management activities and the key to implementing many of the agency's trade transformation initiatives. The ACEopedia is designed as a centralized resource for information on ACE.

What follows on the subsequent pages is a series of fact sheets that can stand on their own or be integrated into a single document providing an overview of ACE capabilities.

“ACE, the U.S. Single Window, is one of the most complex IT projects the US government has ever seen and would not have been possible without our strong partnerships and collaboration across government and industry. We will continue to work together to make ACE good for business and for American prosperity.”

DEBORAH AUGUSTIN, EXECUTIVE DIRECTOR

ACE BUSINESS OFFICE

U.S. CUSTOMS AND BORDER PROTECTION

AUTOMATED COMMERCIAL ENVIRONMENT

REALIZING THE SINGLE WINDOW

DEVELOPING TRANSFORMATIONAL SOFTWARE

WORKING SMARTER

ACE Overview

U.S. Customs and Border Protection (CBP) has modernized the business processes essential to securing U.S. borders, speeding the flow of legitimate shipments and targeting illicit goods that require scrutiny. The key technology driver of these initiatives is the Automated Commercial Environment (ACE). ACE is the backbone of CBP's trade processing and risk management activities and provides a single, centralized access point to connect CBP, Partner Government Agencies (PGAs) and the trade community.

On February 19, 2014, President Obama signed the executive order on *Streamlining the Export/Import Process for America's Businesses*. ACE is the system through which the Single Window is realized. ACE is the Single Window for trade processing, the primary system through which the international trade community submits import/export data, and the government determines admissibility.

Following the delivery of core trade processing capabilities in ACE, the system will move into an operations and maintenance phase. CBP will work with stakeholders to prioritize "post core" development initiatives, continuing to enhance ACE and simplify and modernize CBP processes in line with CBP trade priorities and available funding.

For more details on ACE please visit www.cbp.gov/ace.

Implementing the Single Window

CBP and over 47 agencies are involved in the trade process and, among these agencies, over 250 forms are required for imports and exports. In the past, processes were largely paper-based and required information to be keyed into multiple electronic systems. As a result, importers and exporters were often required to submit the same data to multiple agencies at multiple times. The Single Window initiative, originally established under the International Trade Data System (ITDS), has created a single system, eliminated multiple paper processes, and allowed importers and exporters to file information once, to one system.

Executive Order 13659, *Streamlining the Export/Import Process for America's Businesses*, signed on February 19, 2014, directed the U.S. federal agencies with a role in trade to utilize ITDS by December 2016. ACE is that Single Window—the primary system through which the trade community report imports and exports and the government determines admissibility.

Through ACE as the Single Window, manual processes are streamlined and automated, and the international trade community can more easily and efficiently comply with U.S. laws and regulations.

Benefits of the Single Window

- Quicker data availability for government – better identification of dangerous or prohibited shipments
- Automated agency interactions
- Reduced paper
- Near real-time decision making for government
- Easier for industry to comply with regulations
- Reduced costs

Technical Capabilities that Enable Single Window Processing in ACE

Interoperability Web Services

The pipeline through which data is transmitted between CBP and PGAs. This capability enables improved information sharing and faster decision making by the government.

PGA Message Set

The consolidated set of data to be collected electronically from trade partners by CBP on behalf of government agencies. Data submitted in this manner has replaced the myriad of paper forms formerly required by multiple agencies.

Document Image System

Allows trade partners to supply supporting documentation electronically as image files to CBP and PGAs. DIS integrates with the ACE Secure Data Portal, allowing authorized personnel access to images to perform coordinated reviews.

Partner Government Agencies

CBP and more than 47 federal agencies are working together on the Single Window.

DEPARTMENT OF AGRICULTURE

AMS | Agricultural Marketing Service
APHIS | Animal and Plant Health Inspection Service
FAS | Foreign Agricultural Service
FSIS | Food Safety and Inspection Service
GIPSA | Grain Inspection, Packers & Stockyards Administration

USTR | Office of the United States Trade Representative

For a full list of agencies with entry, entry summary, or export requirements and their associated forms, please reference the [ACE PGA Forms Lists](#) on www.cbp.gov/ace-pga. The document outlines what modes of electronic communication, Document Image System (DIS) or Partner Government Agency Message Set (PGA MS), will be required to support submission of PGA forms or data.

Manifest

Manifests for all modes of transportation — truck, ocean, rail and air — must be filed in ACE. ACE import manifest capabilities have dramatically enhanced CBP's ability to protect the nation's borders while facilitating the flow of legitimate trade. CBP has developed ACE to accept manifest data digitally saving importers, carriers, and brokers significant time. Truck carriers are able to file manifests via electronic data interchange (EDI) and the ACE Secure Data Portal, while ocean, rail, and air manifest data is transmitted solely by

EDI. ACE manifest functionality also allows for enhanced capabilities such as delegation of custodial bonds for authorized users.

Capabilities

Truck

- ✓ File directly in ACE through Portal or EDI
- ✓ Submit electronic manifests to CBP prior to a truck's arrival at the border
- ✓ Record and track account details related to drivers, trucks (conveyances), equipment, shippers and consignees

Air, Ocean & Rail

- ✓ File through EDI
- ✓ View consolidated manifest and entry data at the bill of lading or container level through ACE Portal
- ✓ Filers create and maintain rail line release Entry Banks

Benefits

- Designate a list of authorized partners who can use carrier custodial bonds (i.e. In-Bond Authorization)
- Receive enhanced visibility of cargo status
- Less data required to be filed, compared to paper forms
- Reduce wait time for processing at Ports of Entry
- Status message replies sent via electronic data interchange (EDI)

Cargo Release

CBP used the development of ACE as an opportunity to simplify the entry process. Working with representatives of trade associations, CBP compared the data elements necessary for releasing cargo with the data that the trade had available in the pre-departure environment. The result of this work is a reduced data set consisting of fewer required data elements. Electronic entries for all entry types must be filed in ACE.

Benefits

- Streamlined submission of data elements
- No longer file paper CBP Form 3461
- Ability for CBP and PGA personnel to provide enhanced security, safety and compliance through faster processing
- Changes can be submitted electronically
- More efficient and effective collection of fees

Capabilities

Truck,
Air,
Ocean, &
Rail

- ✓ File through EDI
- ✓ Submit Partial Quantities
- ✓ File In-Bonds
- ✓ Transmit Split Shipments
- ✓ Query Entries via ABI
- ✓ Certify Entry from Summary Submissions
- ✓ File Corrections and Cancellations
- ✓ Receive CBP-initiated Corrections
- ✓ Expand single filing to include Importer Security Filing (ISF) data (Ocean)
- ✓ Process Remote Location Filing
- ✓ File Expedited Release
- ✓ File Entry Types (All)

U.S. Customs and
Border Protection

Entry Summary

Electronic entry summaries for all entry types must be filed in ACE. Filers are also able to submit post summary corrections, electronic bonds, and protests through ACE. CBP has deployed ACE functionality that allows for the processing of critical system “edits” or checks, which validate the accuracy of the data being submitted to CBP and alerts users of errors in data.

Capabilities

Entry Summaries

ACE supports the following entry summary capabilities:

- ✓ Filing of all entry types
- ✓ Filing of post summary corrections
- ✓ Creating blanket declaration records through the ACE Portal

Enhanced Validations

ACE provides automated validation calculations for:

- ✓ Harbor Maintenance Fee
- ✓ Classification
- ✓ Simple and Complex Duty Calculations
- ✓ Merchandise Processing Fee
- ✓ Informal Entry Restrictions
- ✓ Charges Restrictions
- ✓ Taxes and Other Fees

eBond

ACE provides e-bond processing for:

- ✓ Single Transaction Bonds
- ✓ Continuous Bonds

Protest

ACE supports the following protest capabilities:

- ✓ Submit and manage electronically at no cost
- ✓ Presentation date/time electronically stamped
- ✓ View real-time status and receive e-mail notices

Benefits

- Reduce invoice transmissions through Census Overrides
- Replace paper processes with electronic post summary corrections
- Decrease courier and administrative costs
- eBond Processing

Planned Capabilities

The following entry summary capabilities are targeted for deployment in 2017:

- Reconciliation
- Drawback
- Liquidation
- Statements

Exports

Export capabilities in ACE have incorporated those of the legacy Automated Export System (AES) while establishing a single automated processing platform for all export commodity, manifest, and licensing data.

Benefits

- Migration of commodity filing system, AES, to ACE achieved the Single Window filing system for export data
- Incorporates Bureau of Industry and Security (BIS) license control updates to include State Department licenses now under the authority of BIS
- Availability of exporter account and export reports via ACE Portal

Capabilities

All Modes

- ✓ Ability to accept and process commodity filings via EDI or ACE AESDirect

Air, Rail & Ocean

- ✓ Manifest processing (CBP is rolling out export manifest via established pilots)

Getting Started with ACE

ACE modernizes and enhances trade processing with features that consolidate and automate border processing and provide a single, centralized way to connect CBP, Partner Government Agencies and the trade community. ACE allows CBP representatives to receive and process data more quickly, while allowing PGAs to receive and respond to data that falls within their jurisdictions. With the ACE Secure Data Portal, the trade community also has online access to its CBP transactional data.

There are two primary methods of interacting with ACE:

1. Filing transactions via Electronic

Data Interchange (EDI) Interfaces:

EDI is the mechanism through which transactions (entries, entry summaries, and manifests) can be filed in ACE.

2. Using the ACE Secure Data Portal:

The ACE Portal is an online tool that allows users to file electronic truck manifests, protests, export commodity filings and, for low volume filers, Importer Security filings. Users can also access financial data and run reports. ACE reports can be used to monitor compliance and daily operations.

<i>"I want to..."</i>	ACE via EDI Interfaces	ACE Portal
 Send Importer Security Filing Data <small>*Only low volume through Portal (less than 12 per year)</small>		
 File an Import Air, Ocean, or Rail Manifest

 File Export Air, Ocean and Rail Manifest	<i>Pilots in Progress!</i>	
 File Export Commodity Data		

ACE Portal

The Secure Data Portal is a web-based entry point for ACE. It provides a centralized online access point to connect CBP, trade representatives and government agencies involved in importing and exporting goods into and out of the United States. The portal provides account holders the ability to identify and evaluate compliance issues, monitor daily operations, select periodic monthly statement print options, review and respond to CBP post summary requests. Additionally, account holders may access the reports tool to compile data, perform national trend analysis, and file electronic protests, truck manifests, and export commodity information. Low volume filers may access the importer security filings via a single system, the ACE portal.

Receive Near Real-Time Access to Data

- Account Revenue data updated hourly
- Cargo Release and Entry Summary, Protest, and Export Data refreshed nightly

Reports

Improve compliance with trade laws by running targeted reports to conduct in-house audits, identify systemic errors and provide insight to those transactions under review by CBP.

- Identify unauthorized filers
- Monitor entry summary, protest, and export filing transactions by filer
- Monitor in-bond movements

REPORT TYPES

General	✓ Cargo Release and Entry Summary Transaction Details
Financial	✓ Periodic Monthly Statement Transaction Details
Exports	✓ Export Commodity Transaction Details
Manifest	✓ In-Bond Transaction Details
Reference	✓ UN Location and Firms Codes
Protest	✓ Protest Transaction Details

Accounts

- Access transaction and financial data
- Download large sums of account data, import into a local reporting system or export into other applications
- Customize Periodic Monthly Statements payment schedules
- Respond to CBP and PGA request for additional information electronically

Access the ACE Portal

U.S. Customs and
Border Protection

Periodic Monthly Statement

With Periodic Monthly Statement, trade users can streamline accounting and payment of duties and fees. By signing up, users can adopt a periodic payment schedule on an interest free monthly basis. Filers may mark entry summaries they wish to pay on statement and then submit payments through Automated Clearing House (ACH) processing. ACE account holders have the ability to pay for shipments entered or released during the previous calendar month by the fifteenth business day of the following month.

Want to apply?

Importers and Brokers can send an activation email request to:

periodicstatement@cbp.dhs.gov

The email message must include:

- “Activation Request” in the subject line. CBP recommends including a carbon copy to the importer’s CBP account manager, if one is assigned
- Importer of Record number(s) or the Filer code for PMS activation
- The Top Account ACE ID of the Portal account, if one has been established by the requester
- Scanned image of CBP Form 5106, titled “PMS Activation” across the top of the form for non-portal importers

How to get started

Importers and brokers with ACE Portal accounts can edit the Periodic Monthly Statement Calendar. For more information on PMS, please download a copy of the [Periodic Monthly Statement User Guide](#) posted on www.CBP.gov/ace.

PMS Benefits

- Pay duties and fees
- Pay duties for released goods during a given month as late as the 15th working day of the following month
- Pay designated entry summaries for a given month on one statement
- Select either a national or a port statement
- Brokers may pay on behalf of importers
- Track activity with customized account views through ACE Secure Data Portal

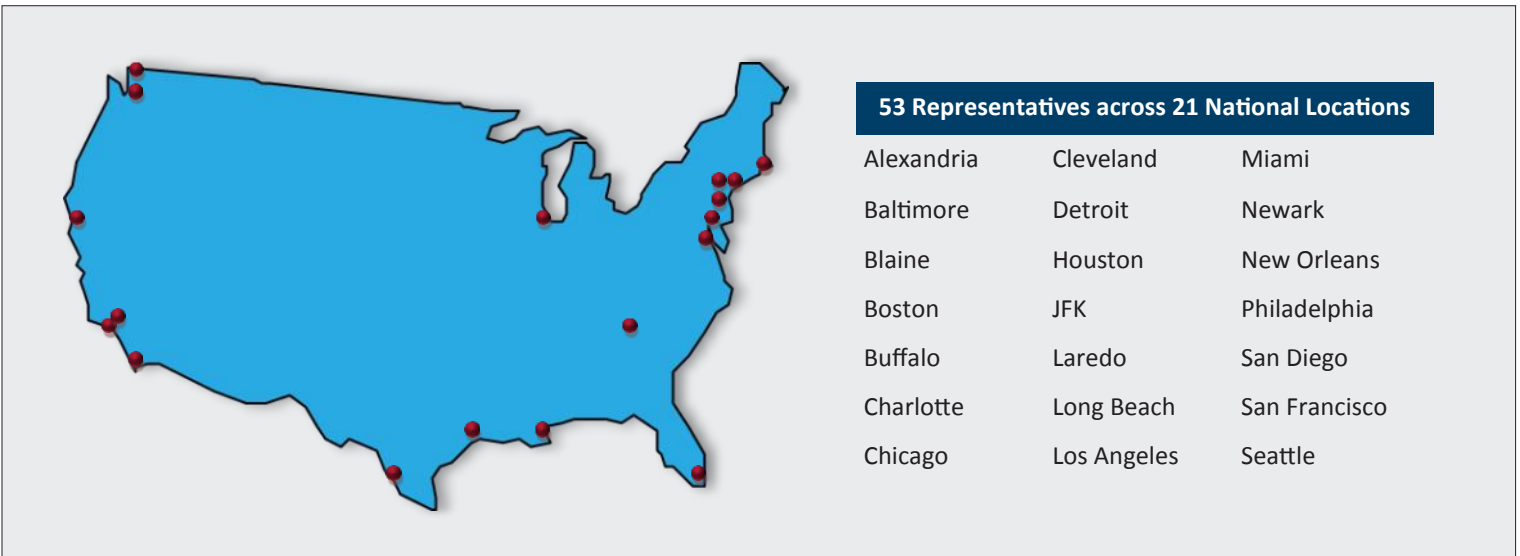

PMS Exclusions

Entry summaries not eligible for inclusion on a Periodic Monthly Statement include:

- Duty Deferral; Entry Type 08
- Reconciliation; Entry Type 09
- Entry summaries with IRS tax class codes

ACE Client Representatives

Client representatives are the primary point of contact for importers, exporters, transportation providers, and brokers interested in learning how to automate any of their customs processes. Client representatives started out as an Automated Broker Interface (ABI) technical support group 30 years ago, but have greatly expanded their responsibility as CBP's automated systems have become more extensive under the ACE system. Through their participation in program design, marketing, facilitating, and training of trade groups, client representatives have been instrumental in the success of CBP's automation. Client representatives are a key supporter of CBP operations in the field and their deep knowledge of the nuances of the automated system has positively impacted many stakeholders.

Support

Client representatives assist the trade community with a wide range of ACE-related functions and serve as the primary point of contact for system-related problems and questions. Client representatives also facilitate the trade's operational and technical participation with the CBP automated systems. Contact your assigned client representative directly with questions or for more information on how to get started with ACE.

Write a Letter of Intent

Request automated system access.

Apply for VPN Connectivity

Required to communicate with CBP automated systems.

Sign a CBP Interconnection Security Agreement

Required for all CBP automated systems participants.
